

Employee	<i>A</i>	<i>B</i>	<i>C</i>	<i>D</i>	<i>E</i>	<i>F</i>	<i>G</i>	<i>H</i>	<i>I</i>	<i>J</i>
Interview test, x %.	65	71	79	77	85	78	85	90	81	62
Performance after one year, y %.	65	74	82	64	87	78	61	65	79	69

(a) Showing your working clearly, calculate the product moment correlation coefficient between the interview test and the performance after one year.

The product moment correlation coefficient between the skills assessment and the performance after one year is -0.156 to 3 significant figures.

(b) Use your answer to part (a) to comment on whether or not the interview test and skills assessment are a guide to the performance after one year. Give clear reasons for your answers.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Patient	A	B	C	D	E	F	G	H	I	J	K	L
Cotinine level, x	160	390	169	175	125	420	171	250	210	258	186	243

(a) Find the mean and standard deviation of the level of cotinine in a patient's blood. **(4)**

(b) Find the median, upper and lower quartiles of these data. (3)

(c) Identify which patient(s) may have been smoking more than a packet of cigarettes a day. Show your working clearly. (4)

One measure of skewness is found using $\frac{(Q_1 - 2Q_2 + Q_3)}{(Q_3 - Q_1)}$.

(d) Evaluate this measure and describe the skewness of these data. (3)

[illegible]

Use the histogram to calculate the number of runners who took between 78.5 and 90.5 minutes to complete the fun run.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

5. The following shows the results of a wine tasting survey of 100 people.

96 like wine *A*,
93 like wine *B*,
96 like wine *C*,
92 like *A* and *B*,
91 like *B* and *C*,
93 like *A* and *C*,
90 like all three wines.

- (a) Draw a Venn Diagram to represent these data.

(6)

Find the probability that a randomly selected person from the survey likes

- (b) none of the three wines,

(1)

- (c) wine *A* but not wine *B*,

(2)

- (d) any wine in the survey except wine C,

(2)

- (e) exactly two of the three kinds of wine.

(2)

Given that a person from the survey likes wine A,

- (f) find the probability that the person likes wine C.

(3)

[illegible]

- (b) Find the standard deviation of the weights of the bags of popcorn. (5)

(c) Find the probability that a customer will complain. (3)

(Total 9 marks)

7. Tetrahedral dice have four faces. Two fair tetrahedral dice, one red and one blue, have faces numbered 0, 1, 2, and 3 respectively. The dice are rolled and the numbers face down on the two dice are recorded. The random variable R is the score on the red die and the random variable B is the score on the blue die.

(a) Find $P(R=3 \text{ and } B=0)$. (2)

The random variable T is R multiplied by B .

(b) Complete the diagram below to represent the sample space that shows all the possible values of T .

3				
2		2		
1	0			
0				
B R	0	1	2	3

Sample space diagram of T (3)

(c) The table below represents the probability distribution of the random variable T .

t	0	1	2	3	4	6	9
$P(T=t)$	a	b	$1/8$	$1/8$	c	$1/8$	d

Find the values of a, b, c and d . (3)

Find the values of

(d) $E(T)$, (2)

(e) $\text{Var}(T)$. (4)

Question 7 continued

Handwriting practice lines for Question 7 continued.

Q7
