

7.

Figure 1

Figure 1 shows part of the curve with equation $y = \sqrt{(\tan x)}$. The finite region R , which is bounded by the curve, the x -axis and the line $x = \frac{\pi}{4}$, is shown shaded in Figure 1.

- (a) Given that $y = \sqrt{(\tan x)}$, complete the table with the values of y corresponding to $x = \frac{\pi}{16}$, $\frac{\pi}{8}$ and $\frac{3\pi}{16}$, giving your answers to 5 decimal places.

x	0	$\frac{\pi}{16}$	$\frac{\pi}{8}$	$\frac{3\pi}{16}$	$\frac{\pi}{4}$
y	0				1

(3)

- (b) Use the trapezium rule with all the values of y in the completed table to obtain an estimate for the area of the shaded region R , giving your answer to 4 decimal places.

(4)

The region R is rotated through 2π radians around the x -axis to generate a solid of revolution.

- (c) Use integration to find an exact value for the volume of the solid generated.
