

3. A car starts from rest and moves with constant acceleration along a straight horizontal road. The car reaches a speed of $V \text{ m s}^{-1}$ in 20 seconds. It moves at constant speed $V \text{ m s}^{-1}$ for the next 30 seconds, then moves with constant deceleration $\frac{1}{2} \text{ m s}^{-2}$ until it has speed 8 m s^{-1} . It moves at speed 8 m s^{-1} for the next 15 seconds and then moves with constant deceleration $\frac{1}{3} \text{ m s}^{-2}$ until it comes to rest.

(a) Sketch, in the space below, a speed-time graph for this journey.

(3)

In the first 20 seconds of this journey the car travels 140 m.

Find

(b) the value of V ,

(2)

(c) the total time for this journey,

(4)

(d) the total distance travelled by the car.
